BEHIND IT

Epic Cash is anonymous P2P electronic cash on a blockchain that is open, public, permissionless, borderless and neutral. As an "enhanced censorship resistance" implementation of the familiar Bitcoin monetary standard, users enjoy trustless operation, hold direct custody of coins, and transact directly with one another through the blockchain. Epic is secured by triple proof of work and prefigures quantum resistance by design.

TECHNICAL SECURITY

CPU

GPU

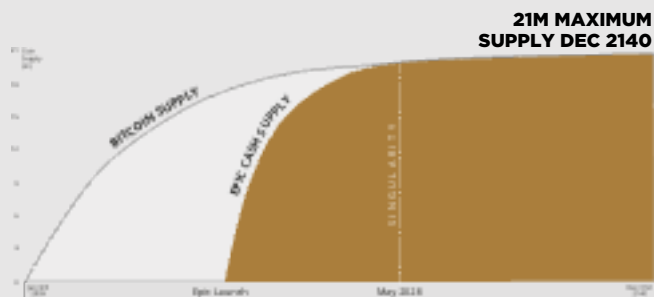

ASIC

Multi-algo Mining

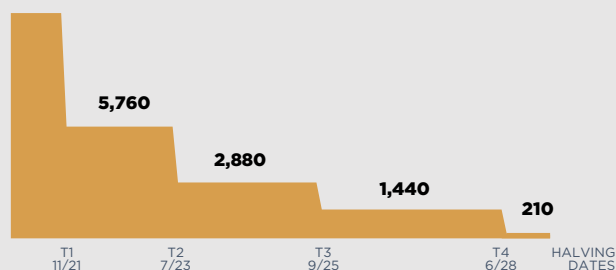

3X proof-of-work

Quantum protection + future-proofing
protection against compromised algorithms

ECONOMIC SECURITY

11,520 DAILY EMISSIONS

100% backwards compatible with BTC.

4 halvings in 8 years – most aggressive of any crypto asset.

Consider this: in 7 years there will only be 210 coins per day created for 8 billion people. Can you afford not to own one?

REGULATORY SECURITY

Howey Compliant – No ICO, No pre-mine, no investors, no control.
Respected US attorney opinion letter: “Epic Cash is not a security”

GOVERNANCE SECURITY

Transparent open community, all decisions made out in the open.
ECR token with proven governance modules from Compound.
<https://labs.epic.tech>

SOCIAL SECURITY

Fair & accessible – anyone can mine. BTC is almost 90% already emitted. EPIC is only 50% emitted. Mining is open to anyone, meaning you too can get your share. Low barriers to entry promise “pitchfork and torch” protection
