# WHY EPIC?

**bitcoin** | **EPIC CASH** ∞

## BITCOIN STANDARD EMISSIONS

Limited supply and ever-decreasing inflation are a proven winning combination. **EPIC matches Bitcoin's emissions.**

EPIC HALVINGS 1 2 3 4 5 6 7

## ANYONE CAN MINE

**100%** expensive specialized ASIC equipment

**60%** General-purpose CPU, AMD/Intel

**38%** Standard GPU, AMD/NVIDIA

**2%** Specialized ASIC

## SCALABLE

CHAIN SIZE
**277GB**
Growing at ~1GB/week
All transactions are stored forever

CHAIN SIZE
**1.2GB**
Growing at ~0.01GB/week
Cut-through and pruning – transactions are aggregated, and unnecessary data is purged from the blockchain

## FUNGIBLE

Coins retain their history, leading to the problem of 'tainted coins' and a two-tier market with freshly mined coins trading at a premium

Coins are interchangeable because they don't retain their history

## PRIVATE

Leaves a **permanent public record** of transactions unless inconvenient additional measures are taken

**Privacy is optional and difficult**

**100% privacy** for all transactions by default. Future proofed against technological advances as no addresses are stored

**No other steps required**
